1. Espe U. Fürstenberger G, Marks F, Kaszkin M, Kinzel V. 
   Early changes in the arachidonic acid metabolism of HeLa cells in response to 
   tumor promoter 12-O-tetradecanoylphorbol-13-acetate (TPA) and related 
   compounds 

   Role of arachidonic acid release in the G2 delay induced by tumor promoter TPA in 
   HeLa cells 

   Dual effect of the phorbol ester TPA on arachidonic acid release from HeLa cells 
   FEBS Letters 1988, 233:244-248

   Epidermal growth factor inhibits transiently the progression from G2-phase to 
   mitosis: 
   A receptor-mediated phenomenon in various cells 
   Cancer Res. 1990, 50:7932-7936

   A proposed common mechanism by which phorbol ester and epidermal growth 
   factor delay the progression from G2-phase to mitosis of HeLa cells through 
   phospholipid metabolites 
   Cancer Res. 1991, 51:4328-4335

   Interference of xanthate compounds with phorbol ester TPA-induced changes of 
   phospholipid metabolism: inhibition of prostaglandin production 

7. Kaszkin M, Richards J, Kinzel V. 
   Proposed role of phosphatidic acid in the extracellular control of the transition 
   from 
   G2-phase to mitosis exerted by epidermal growth factor in A431 cells 
   Cancer Res. 1992, 52:5627-5634

8. Kaszkin M, Seidler L, Kast R, Kinzel V. 
   Epidermal growth factor-induced production of phosphatidylalcohol by HeLa cells 
   and A431 cells through activation of phospholipase D 

   Accumulation of ester- and ether-linked phosphatidates by HeLa cells in response 
   to ionophore A23187 through activation of phospholipase D 
   Biological Chemistry Hoppe-Seyler 1992, 373:151-157
Mobilization of diacylglycerol in intact HeLa cells by exogenous phospholipase C 
from Cl. perfringens is accompanied by release of fatty acids including arachidonic 
acid 

11. Kaszkin M, Richards J, Kinzel V. 
Phosphatidic acid mobilized by phospholipase D is involved in the TPA-induced 
G2-delay of A431 cells 

12. Seidler L, Kaszkin M, Kinzel V. 
Primary alcohols and phosphatidylincholine metabolism in rat brain synaptosomal 
membranes via phospholipase D 

Inhibition of cdc25-C phosphatase at the transition from G2-phase to mitosis 
induced by the exogenous factors EGF and phorbolster TPA 

14. Klein S, Kaszkin M, Barth H, Kinzel V. 
Signal transduction through epidermal growth factor receptor is altered in Hela 
monolayer cells during mitosis 

Negative regulation of interleukin-1β-activated neutral sphingomyelinase by protein 
kinase C in rat mesangial cells 

Cross-talk between group IIA-phospholipase A2 and inducible NO-synthase in rat 
renal mesangial cells 

M, Pfeilschifter J. 
Modulation of cytokine-induced expression of secretory phospholipase A2-type IIA 
by protein kinase C in rat renal mesangial cells 
Biochem. Pharmacol. 1999, 58:1751-1758

The human papillomavirus type 16 E5 protein modulates phospholipase c-β1 activity 
and phosphatidylinositol turnover without involvement of growth factors. Oncogene 
1999, 18:6714-6718
Inhibition of NF-κB-mediated proinflammatory gene expression in rat mesangial cells by the enolized 1,3-dioxane-4,6-dione-5-carboxamide CGP-43182

Characterization of group X phospholipase A2 as the major enzyme secreted by unstimulated human keratinocytes and regulation by phorbol ester TPA

21. Scholz-Pedretti K, Pfeilschifter J, Kaszkin M.
Potentiation of cytokine induction of group IIA phospholipase A2 in rat mesangial cells by ATP and adenosine via the A2A adenosine receptor

22. Loew D, Möllerfeld J, Puttkammer S, Schrödter A, Kaszkin M.
Investigations on the pharmacokinetic properties of Harpagophytum extracts and their effects on eicosanoid biosynthesis in vitro and ex vivo.

Regulation of LPS-induced delayed release of arachidonic acid and prostaglandin D2 in liver macrophages: Involvement of group IV cytosolic phospholipase A2, but not of group V and group IIA secretory phospholipase A2
Cell Signal. 2002; 14:199-204

Potentiation of TNFα-stimulated group IIA phospholipase A2 expression by PPARγ activators in rat mesangial cells

Inhibition of LPS-induced chemokine production in human lung endothelial cells by lipid conjugates anchored to the membrane.

Dephosphorylation of endothelial nitric oxide synthase mediates the anti-angiogenic effects of endostatin
FASEB J. 2002, 16:706-708

27. Rodríguez I, Kaszkin M, Kabsch K, Marqués MM, Mao X, Alonso A.
Hyperosmotic stress induce cPLA2 activation in HaCaT cells by an epidermal growth factor receptor-mediated process
28. Loew D, Kaszkin M. 

29. Beck GCh, Yard BA, Schulte JM, Haak, van Ackern K, van der Woude JF, Kaszkin M. 
Secreted phospholipases A2 induce the expression of proinflammatory CXC chemokines in lung microvascular endothelium 

Amelioration of endotoxin-induced sepsis in rats by membrane-anchored lipid conjugates. 

31. Kaszkin M, Loew D. 
Comparability of herbal medicinal products. 
Journal of the European Society of Regulatory Affairs May/June 2003 Vol. 10, No. 3

Differentiation-dependent regulation of secreted phospholipases A2 in murine epidermis 

Potentiation of TNF-α-induced sPLA2-IIA expression in rat mesangial cells by an autocrine loop involving secreted PLA2 and PPARγ activation 
J. Biol. Chem. 2003, 278:29799-29812

34. Fichtlscherer S, Kaszkin M, Breuer S, Dimmeler S, Zeiher AM. 
Elevated secretory group II phospholipase A2 serum activity is associated with impaired endothelial vasodilator function in patients with coronary artery disease 

Activation of phospholipase C-β1 in human keratinocytes by hyperosmolar shock without enzyme phosphorylation. 

Downregulation of iNOS expression in rat mesangial cells by special extracts of Harpagophytum procumbens derives from harpagoside-dependent and independent effects 
Phytomedicine 2004, 11:585-595

37. Kaszkin M, Beck KF, Eberhardt W, Pfeilschifter 
Unravelling Green Tea's Mechanisms of Action: More than Meets the Eye 

Activation of estrogen receptor-β by a special extract of Rheum rhaponticum (Err 731®), its aglycones and structurally related compounds

Schweizer Zeitschrift für Phytotherapie 2007, 2:2-8

Wirksamkeit und Sicherheit von Phytoestrol® N (Extrakt Rheum rhaponticum ERr 731®) bei klimakterischen Beschwerden: Ergebnisse einer prospektiven, sechsmonatigen Anwendungsbeobachtung mit Phytoestrol® N
Jatros Journal für Menopause 2007, 3:8-15

Subtype-specific activation of estrogen receptors by a special extract of Rheum rhaponticum (ERr 731®), its aglycones and structurally related compounds in U2OS human osteosarcoma cells
Phytomedicine, 2007, 14:716-726

Long-term toxicity studies in dogs support the safety of the special extract ERr 731 from the roots of Rheum rhaponticum.

52. Kaszkin-Bettag M.
Placebo-kontrollierte Doppelblindstudie: Homöopathikum Sinfrontal® hochwirksam bei bakterieller akuter Kieferhöhlenentzündung
Naturheilpraxis 61. Jahrgang 2008, 80-81

53. Hasper I, Ventskovskiy BM, Rettenberger R, Heger PW, Riley DS, Kaszkin-Bettag M.
Long-term efficacy and safety of the special extract ERr 731 of Rheum rhaponticum in perimenopausal women with climacteric complaints
Menopause 2009, in press
Efficacy of the Special Extract ERr 731 from Rhapontic Rhubarb for Menopausal Complainst: A 6-month Open Observational Study
Alternative Therapies in Health and Medicine 2008, 14:32-38

55. Kaszkin-Bettag M, Hasper I, Heger PW.
Der Spezialextrakt ERr 731® aus der Rhapontikrhabarberwurzel bei menopausalen Beschwerden: Langzeitstudie bestätigt Wirksamkeit
Schweizer Zeitschrift für Phytotherapie 2008, 8: 9-12

A double-blind, placebo-controlled replication trial confirms the efficacy and safety of the special extract ERr 731 of Rheum rhaponticum in perimenopausal women with climacteric complaints.
Alternative Therapies in Health and Medicine, in press

57. Hasper I, Ventskovskiy BM, Rettenberger R, Heger PW, Riley DS, Kaszkin-Bettag M.
Long-term efficacy and safety of the special extract ERr 731 of Rheum rhaponticum in perimenopausal women with climacteric complaints
Menopause 2009; 16:117-131

Efficacy of the Special Extract ERr 731 from Rhapontic Rhubarb for Menopausal Complaints: A 6-month Open Observational Study
Altern Ther Health Med 2008; 14:32-38

Confirmation of the efficacy of ERr 731 in perimenopausal women with menopausal symptoms.
Altern Ther Health Med 2009; 15:24-34

60. Papke A, Kretzschmar G, Zierau O, Kaszkin-Bettag M, Vollmer G.
Effects of the special extract ERr 731 from Rheum rhaponticum on estrogen-regulated targets in the uterotrophy model of ovariectomized rats.

61. Orellana Alvarellos G, Ruiz de Vinaspre Alvear P, Kaszkin-Bettag M.
Clinical Evaluation of Traumeel injection therapy in the management of pain in patients after breast cancer treatment: a case series report

62. Bedell W, Kaszkin-Bettag M.
Coherence and health care cost--RCA actuarial study: a cost-effectiveness cohort study.
63. Kaszkin-Bettag M.  

One year clinical and radiological results of a prospective, investigator-initiated trial investigating a novel purely autologous 3-dimensional ACT product in the knee. Cartilage November 4, 2011.

65. Kaszkin-Bettag M, Hildebrandt W.  
**Lecture List: Prof. Dr. Marietta Kaszkin-Bettag**

October 2004  
Upregulation of group IB secreted phospholipase A2 and the M-type receptor in the rat anti-Thy-1 model of glomerulonephritis and in glomerular cells in vitro  
International Congress on Phospholipases A2, Platelet-Activating Factor and related Lipid Mediators, Berlin, Germany

February 2004  
Special extracts of Harpagophytum procumbens inhibit the release of the proinflammatory secreted phospholipase A2-IIA in rat mesangial cells  
Conference on Phytopharmaka and Phytotherapy, Campus Charité, Berlin, Germany

May 2003  
Signal transduction by extracellular sPLA2s and their role for PPARβ  
Knechtstedener Workshop of Vaskular Biology, Kloster Knechtsteden, Germany

December 2002  
The family of phospholipases A2  
University Hospital Mannheim, Institute of Nephrology, Mannheim, Germany

October 2002  
Investigations to show the effectiveness of herbal analgetic and antiphlogistic drug preparations using Harpagophytum-Extracts  
Conference on Phytopharmaka and Phytotherapy, Campus Charité, Berlin

July 2002  
Potentiation of cytokine-stimulated sPLA2 induction by PPARalpha agonists in rat mesangial cells  
FASEB Summer Conference on Phospholipases, Tucson, Arizona, USA

December 2001  
Regulation and function of secreted phospholipases A2 in the barrier of the skin and in inflammatory skin diseases  
Beiersdorf, Hamburg, Germany

May 2000  
Secreted phospholipases A2 in diseases: regulation by NO, glucose and protein kinase C  
German Institute for Human Nutrition, Potsdam-Rehbrücke, Germany

February 2000  
Regulation and function of secreted phospholipases A2 in inflammatory processes in the skin and in skin carcinogenesis  
German Cancer Research Center, Heidelberg, Germany

February 2000  
Role of subtypes of the secretory phospholipases A2 for the induction of epidermal hyperproliferation in the model of human keratinocytes an in mouse skin carcinogenesis  
University Hospital, Bonn, Germany

May 1999  
Regulation of the secreted phospholipase A2 in mesangial cells by NO and glucose  
5. Knechtstedener Workshop of Vaskular Biology, Kloster Knechtsteden, Germany
